Personnel Manager
{Name}

Dear Personnel Manager:

I majored in multimedia in both high school and university, and I have a lot of interest in DSP and audio processing, and I have 7 years of experience in backend, frontend, and team building.

In addition, large corporations directly build telephone network systems, understand audio processing, and provide services to various customers in Korea and Japan, and have been concerned about large-scale processing in engineering.

I also experienced how to communicate and contribute to OSS, such as merging technical code improvement PR with Airflow, ImageMagick service, and Mozilla Foundation several times. I learned how to share and communicate with the people who are in the development eco-system.

I currently work with and communicate with US engineers at Riiid, and I have experience working in English, often traveling to Riiid Labs (US branch of Riiid) headquarters in San Ramon, CA to work.

I believe that this experience will serve as a basis for making various contributions in the process of product development in your company, so I would like to ask you to keep an eye on my experience.

I am currently in need of a Visa sponsor to work in the United States and would be grateful if you could take this into consideration.

I would appreciate the opportunity to discuss my qualification more fully in an interview, Thank you for your consideration.

Sincerely,

Sungmin Han
